Pioneer Self Priming Centrifugal Pumps - High Quality, High Performance, Reliable, Ease of Operation

Pioneer Self Priming pumps were designed for reliable, efficient liquid transfer. After initial priming they will continue to reprime automatically. Our semi-open designed impellers are ideal for trash and solids handling and will handle various types of pumpages. The solids handling models will handle up to a 3 inch Spherical Solid.

Our design allows for ease of maintenance. Whether its removing the cover plate to inspect the impeller or an entire rotating assembly, Pioneer Self Priming Pumps are maintenance friendly.

Self Priming Standard Features:

- 17-4 PH Shafting
- External Shimless Impeller/ Wear Plate Adjustment
- Semi-Cartridge Mechanical Seal
- Viton O-Rings
- Modular SAE Mount Available
- Removable Rotating Assembly
- Removable Cover Plate
